COMPANY PROFILE 2026

Engineering that lives inside your business.

Digital and AI engineering for brands — from strategy to systems in production.

Strategy · Engineering · Operations · AI Forward Deployed Engineering

WHO WE ARE

Twelve years of getting things shipped

An engineering-first team that turns ideas into working systems.

Founded in Shanghai in 2014, Jimeng Network is an engineering-first digital and AI services company. Our team brings together internet marketing specialists, brand strategists, senior engineers and designers — and our core engineering team has worked side by side for over a decade.

We deliver end-to-end strategy, engineering and operations for brands across beauty, luxury, e-commerce and internet platforms. Today, we also deploy AI directly into our clients' day-to-day operations through Forward Deployed Engineering (FDE).

2014

Founded

Headquartered in Shanghai

100+

Projects delivered

Across web, mobile, platforms & AI

10M+

Scale systems

Built and operated long-term

1,000+

AI videos / month

Produced at scale for brands

On the front line of every technology wave

From the first websites to AI in production — we have shipped through every shift since 2014.

2014

WEB & BRAND

Digital brand presence

Responsive websites, brand strategy, marketing campaign pages

Mobile

MOBILE & WECHAT

The mobile ecosystem

Official accounts, mini programs, e-commerce apps, community tools

Platforms

ENTERPRISE PLATFORMS

Business-critical systems

Management systems, C2C marketplace & settlement, multi-account platforms

2026

AI-NATIVE

AI in production

AIGC content production lines, AI FDE, our own product ThinkNova

Four core services

From strategy to shipped systems — and now, AI in production.

01

Strategy & Planning

Business models, marketing campaigns and brand strategy — tailored project plans built on your strengths.

02

Engineering & Delivery

Design, development, testing and maintenance for websites, mini programs, apps and enterprise systems.

03

Operations & Growth

Data-driven operation of online platforms and private communities, plus campaign planning and offline events.

NEW

04

AI Forward Deployed Engineering

Engineers embedded on the front line, deploying LLMs, AIGC and AI agents into your real workflows.

04

NEW BUSINESS

AI FDE

Forward Deployed Engineering

**AI projects rarely fail because the model isn't good enough.
They fail because no one wires it into the real business.**

Not outsourcing. Not another SaaS seat.

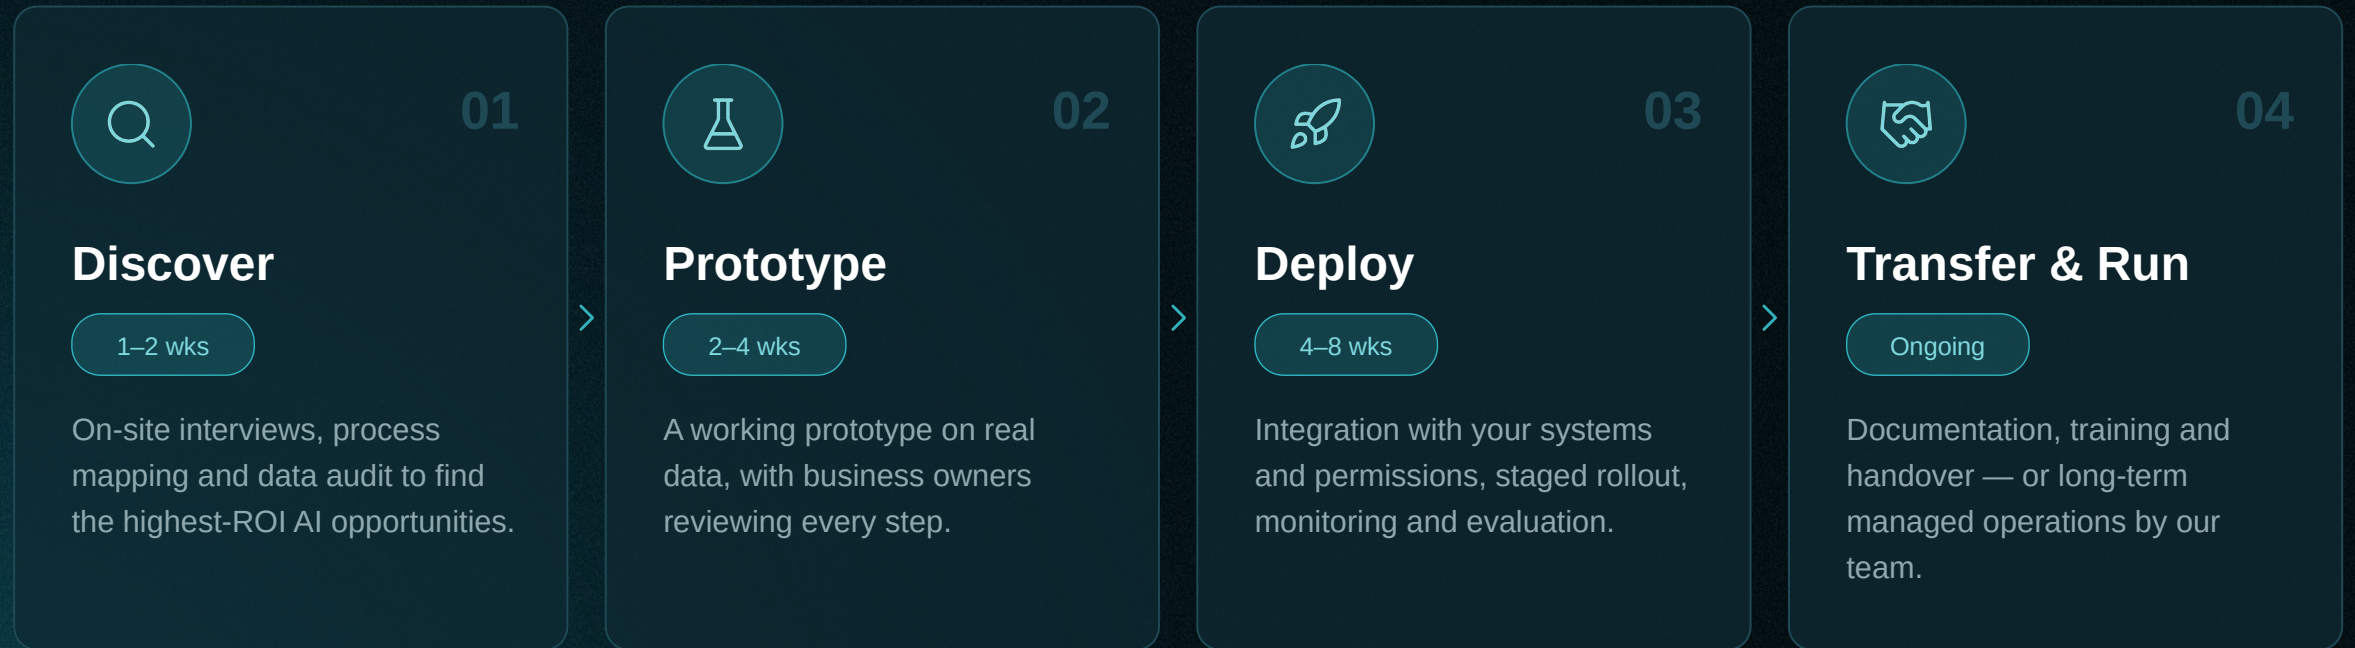

Engineers in the room, accountable for results.

Forward Deployed Engineering was pioneered by leading Silicon Valley AI and data companies. Instead of waiting for requirements from afar, engineers embed with your team on the front line, start from real business problems, and ship AI as production systems that are used, measured and continuously improved.

	Outsourcing	Off-the-shelf SaaS	Jimeng AI FDE
Starting point	A requirements doc	Standard features	Real problems on the ground
Deliverable	Software built to spec	A generic account	AI running inside your business
Customisation	Medium	Low	Deeply fitted to your process & data
Iteration	Every change re-quoted	Wait for the roadmap	Rapid, on-site iteration
Outcome	Ends at handover	You figure it out	Owens results, then transfers know-how

Four phases from idea to production

A proven delivery method, from on-site discovery to handover.

DELIVERABLES

Opportunity assessment · Working prototype · Production system · Evaluation dashboard · Runbook & user guide

* Typical timelines; actual duration depends on scope.

A complete AI engineering stack

From foundation models to the apps your team actually uses.

Applications

AI customer service · Content production · Sales assistants · Analytics agents

Orchestration

Agent workflows · Prompt engineering · Multi-model routing · Evaluation

Data

RAG knowledge bases · Enterprise data integration · Creative asset management

Models

LLMs · Image generation · Video generation · Speech synthesis (multi-vendor)

Guardrails

- Role-based access & audit logs
- Data security & private deployment
- Automated content compliance

Integrations

- WeCom · WeChat · Mini programs
- OA / CRM / e-commerce back-ends
- Object storage & asset libraries

AI for four kinds of business

Playbooks distilled from the industries we have served.

E-COMMERCE & RETAIL

AI Product Content Factory

Product images, selling-point copy and short videos generated in batches, connected to your catalogue and auto-formatted for every channel.

BEAUTY

Smart Creative Hub

Centralised asset management, AI rewriting and localisation for every platform, with automated brand-guideline and ad-compliance checks.

LUXURY

AI Clienteling Assistant

Grounded in product knowledge and service scripts, helping advisors hold warm, on-brand one-to-one conversations.

PLATFORMS

AI Marketing Video Line

Scripting, storyboarding, generation and QA industrialised end to end — sustaining output of a thousand videos a month.

Xianyu: an AI marketing video line

AI-generated marketing videos, delivered at scale.

1,000+

AI marketing videos delivered every month

We produce AI marketing videos at scale for Xianyu's marketing campaigns. Our in-house ThinkNova AIGC pipeline runs as a dedicated production line — from campaign brief and script to storyboard, generation, human QA and batch delivery — fully standardised to sustain 1,000+ videos every month.

AIGC Video

Delivery at Scale

Dedicated Line

Ongoing Ops

PRODUCTION PIPELINE

Brief & Script

Campaign topics turned into scripts

AI Storyboard

Shot-by-shot visual plan

Generation

Video, voice-over and captions

QA & Review

Human checks for quality & brand fit

Batch Delivery

Platform-ready files, on schedule

SELECTED CLIENTS

Brands we have served

From global luxury to China's leading internet platforms.

L'ORÉAL

L'Oréal
Beauty

VACHERON
CONSTANTIN

Vacheron Constantin
Luxury watchmaking

1 号店

Yihaodian (YHD)
E-commerce

Consumer fintech tool

Brand names are used solely to describe our service experience. All trademarks belong to their respective owners.

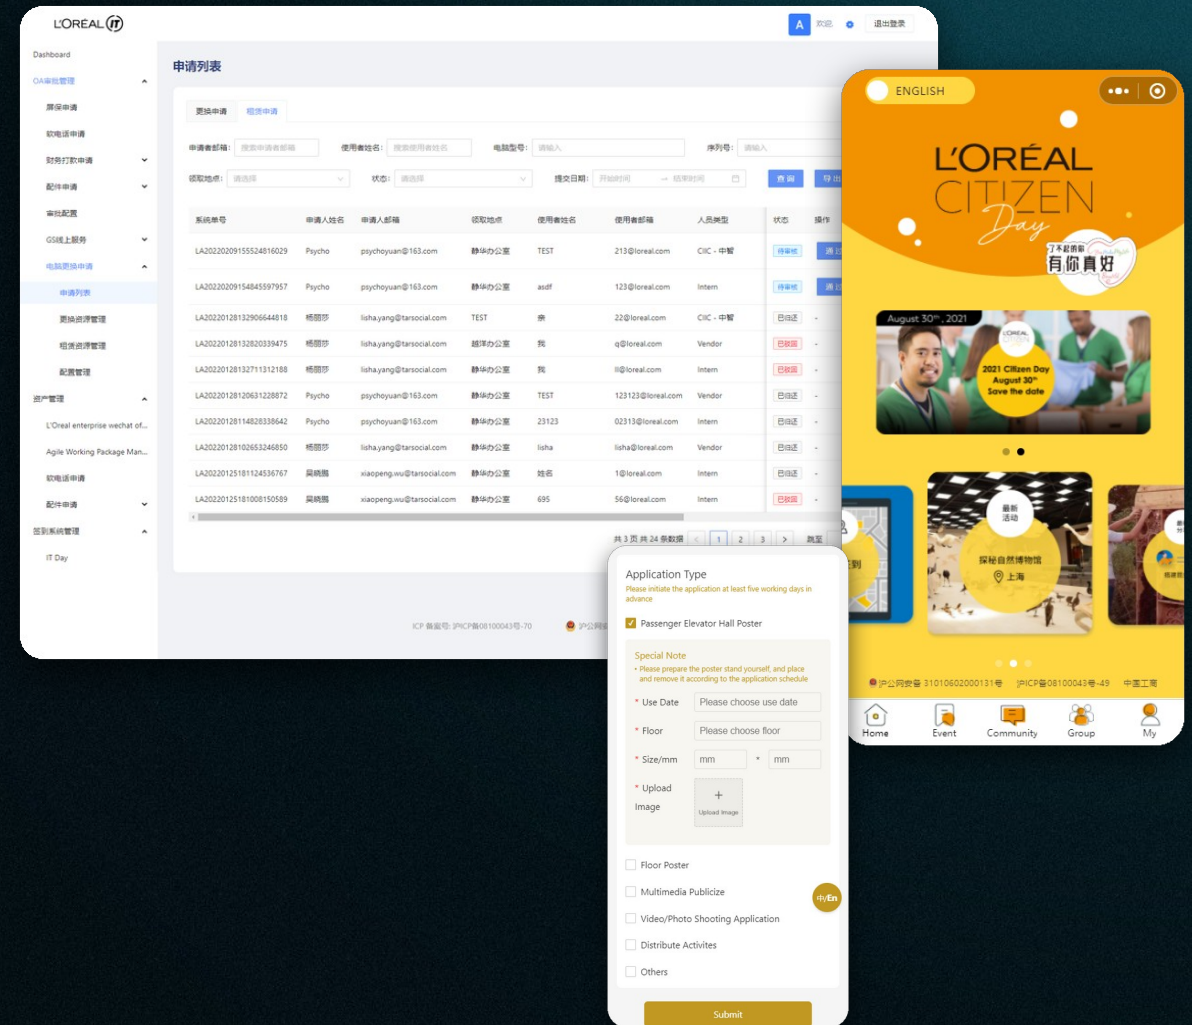

L'Oréal China

Marketing digital & IT services

Long-term IT services for L'Oréal's marketing and OA management systems — from project advice to continuous iteration and maintenance, meeting the brand's strict security requirements.

SCOPE OF WORK

- ✓ Project planning & technical advisory
- ✓ OA management H5 & creative asset management
- ✓ Marketing H5 campaigns & mini programs
- ✓ Multi-account WeChat management platform

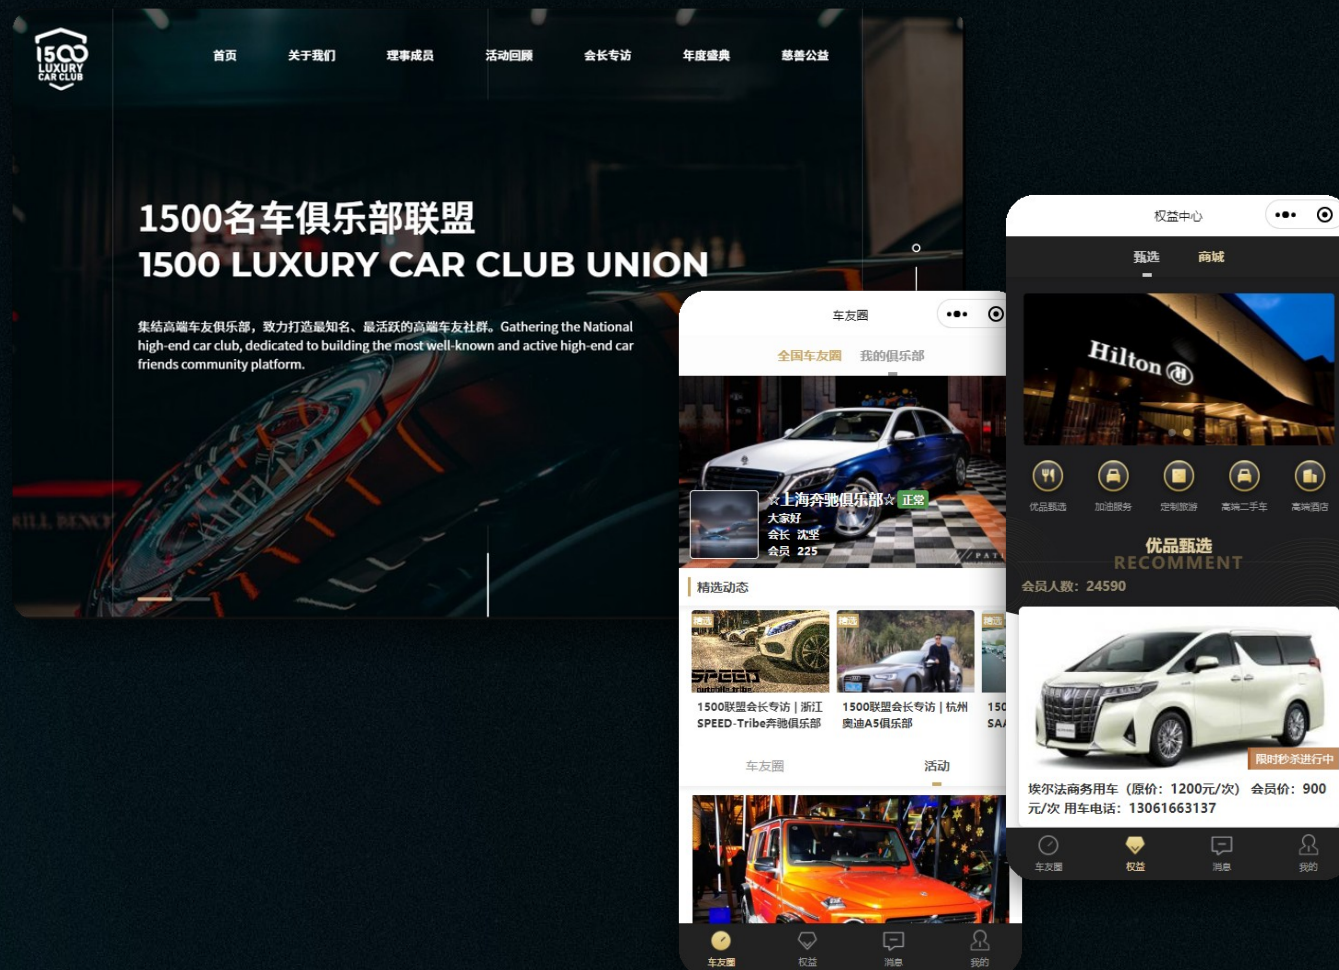

1500 Luxury Car Club Union

Brand, platform & events

A club uniting premium car owners worldwide and bringing together luxury-brand owner clubs across China. We planned and delivered its complete online product suite and supporting marketing.

SCOPE OF WORK

- ✓ Brand communication strategy
- ✓ Website & WeChat official account
- ✓ Community marketing mini program
- ✓ Exhibition planning & on-site execution
- ✓ Ongoing operations advisory

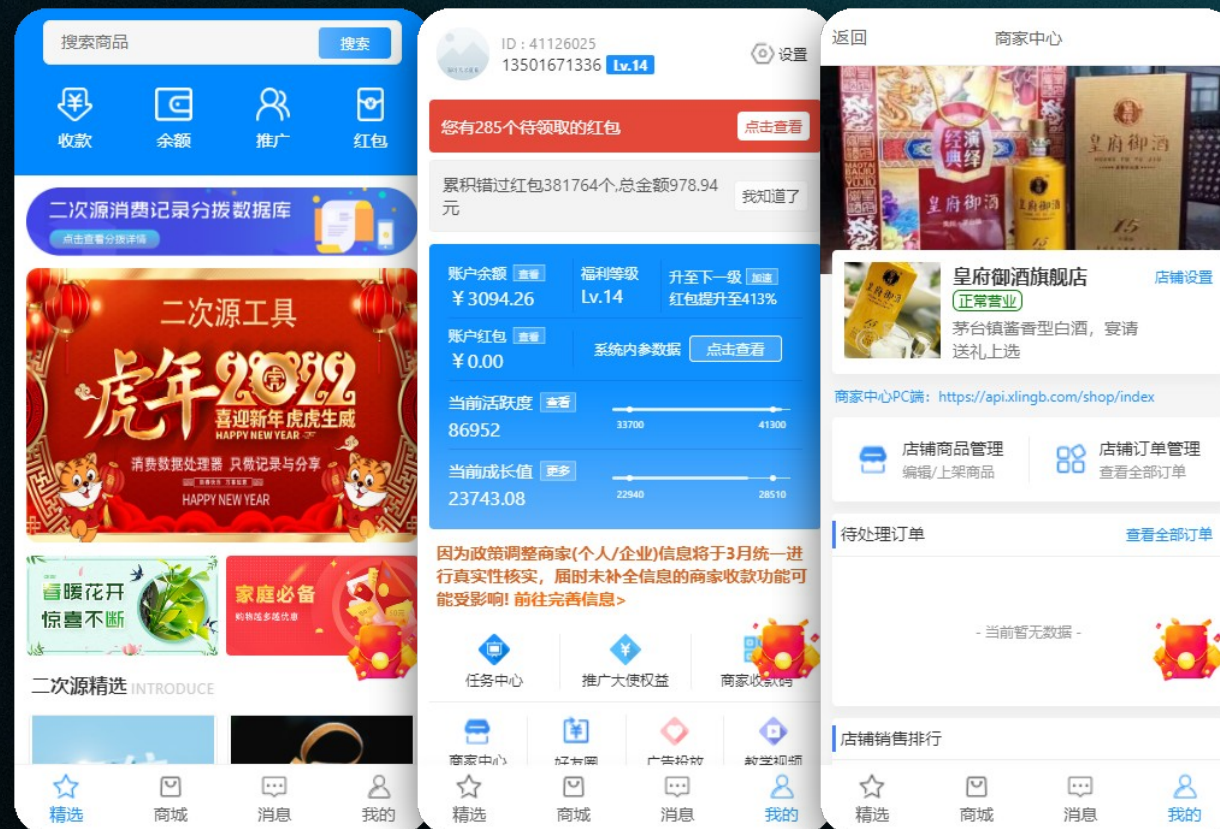

Erciyuan

C2C marketplace, settlement & payment tool

An all-in-one platform combining a C2C marketplace, a settlement system and a payment tool, with user transaction volume exceeding RMB 10 million. We partnered closely from planning through engineering, content and campaigns.

SCOPE OF WORK

- ✓ Project & execution planning
- ✓ WeChat official account / app development
- ✓ Short-video content production
- ✓ Campaign planning & execution

OUR PRODUCT

ThinkNova

An AI marketing content platform built in-house

Pick a scene, add a product, upload a photo — and get a ready-to-post 15-second marketing video or poster in about three minutes.

ThinkNova is both a SaaS product for small businesses and the engine behind the AIGC production lines we deploy for brands.

~3 min

From input to video

9

Output languages

2

Products: video + poster

Pick a scene

01

New launch, store tour, promotion, price list, festivals

Fill in two lines

02

Just the product name and the price or offer

Upload a photo

03

The video faithfully recreates your storefront & products

Generate

04

Script, voice-over, storyboard and captions — all automatic

JIMENG NETWORK

Why brands work with us

Six reasons clients keep coming back.

A decade-long core team

Our core engineers have worked together for over ten years — quality never slips with turnover.

End-to-end capability

Strategy, design, engineering, operations and AI — delivered by one team.

Brand-grade standards

Experienced with global beauty and luxury brands and their security & compliance demands.

Proven at scale

Years of building and operating multiple 10M-scale systems.

AI-native

Our own AIGC pipeline, with proven capacity of a thousand videos a month.

Long-term partner

Dedicated one-to-one service, with continuous iteration well after launch.

Three ways to work with us

Choose the model that fits your project.

Project-Based

Clear scope, milestones and acceptance criteria — ideal for websites, mini programs, apps and enterprise systems.

- ✓ Fixed scope & pricing
- ✓ Milestone acceptance
- ✓ Post-launch warranty

RECOMMENDED

AI FDE

Engineers embedded in your team, delivering AI production systems through discover, prototype, deploy and transfer.

- ✓ On-site or remote embedding
- ✓ Phased delivery & sign-off
- ✓ Knowledge transfer & training

Managed Operations

Content production, platform operations and community management as a monthly service — continuously delivered and improved.

- ✓ Monthly service package
- ✓ AI content at scale
- ✓ Data reviews & iteration

THANK YOU

The digital age changes fast; we never drift with the tide.
We start from delivering value — and do everything we promise.
